CHAIRMAN'S MESSAGE

A confirmed upward trend, such is the result of the 2014 financial year, bringing out the consolidation of the financial base of BMCE Bank of Africa Group, with its earning power growing stronger year by year.

This was recently again demonstrated by the record reached by the Net Income Attributable to the Parent, standing at MAD 1.944 billion, just under the bar of MAD 2 billion, accounting for more than the double of the amount of 2011, thus providing proof of concept for the Group's strategic policy orientations, both in Morocco and abroad.

Combined with the broader diversification of the business sectors, this performance further reflects the rising power of the Group, which is gaining a firmer foothold in Subsaharan Africa, inter alia through, the launch this year of the African Entrepreneurship Award, a competition with strong economic and social impact.

Today, we have reached a new milestone in the development of BMCE Bank, which is gathering further strength as a continental Group, leveraging this powerful « Bank of Africa » brand name by coupling it with our prestigious BMCE Bank brand. « BMCE Bank of Africa » reflects our desire to extend our continental reach by setting up new establishments more especially in English-speaking and Portuguese-speaking parts of Africa.

As a Maghrebien and Pan-African Group, our corporate responsibility is evidenced by all the commitments of our subsidiaries, acting as the operational and efficient vehicle. Whether this relates to financing of developmental projects or to community-based actions geared to promote financial inclusion, the Group, in its African dimension, has managed to position itself as a key player, highly involved in the economic, social and environmental development of the 30 countries where we are doing business.

As part of 60th anniversary of the Independence of Morocco, 2015 will see the celebration of the 55th anniversary of the creation of Banque Marocaine du Commerce Extérieur, as well as the 20th anniversary of its privatization.

We are confident that on these auspicious occasions, the accomplishments made by BMCE Bank and its subsidiaries will be far more striking, living up to the expectations of their shareholders, in line with the stature and the national and international outreach of BMCE Bank of Africa Group.

BMCE BANK GROUP STRATEGY

THE STRATEGY OF BMCE BANK
GROUP RESTS ON THE FOLLOWING
THREE FUNDAMENTAL PILLARS:

EXPANSION

Domestic and global growth

In Morocco, BMCE Bank will be pursuing the extension of its branch network by about 50 branches each year until 2020.

Furthermore, the Group will strengthen its global presence in the high-potential countries of the Bank of Africa Group, of Banque de Développement du Mali and La Congolaise de Banque (whose goal is to become subregional banking groups similar to BOA), in Europe through the European BMCE EuroServices passport, and in Asia following the project for the creation of a BMCE subsidiary in Shanghai.

DEVELOPMENT

Reinforcing existing synergies and capitalizing the Group's business lines

BMCE Bank stands among the leaders of the banking industry in different markets. Therefore, and with a view to maintaining its leadership position, the Bank further consolidates its activities segments especially SMEs, Tele-banking, Key Accounts and High-End Customers, Migrants, Participatory banking, etc.

The Group aims at building intra-group synergies especially at the international level with Bank of Africa, BDM and LCB, through the development of specialized trades ie. leasing, factoring, credit insurance and advisory services, and with the European platform on foreign trade activities and diversification of liquidity sources.

OPTIMIZATION

An efficient business model and an optimal governance

As part of the deployment of its operational efficiency system, BMCE Bank reallocates its shareholders' equity to high potential development segments, especially with the increase of the weight of personal loans and SME financing and the reduction of market activities.

Likewise, and in order to improve the Group representativeness and implement the business model of BMCE Bank, the Group undertakes the recomposition of the Boards of Directors of the subsidiaries.

The broadening and the implementation of the BMCE Bank Business Model throughout the entire network of subsidiaries, along with the support provided for the expansion of the Group internationally, especially in Subsaharan Africa - as part of the Convergence program - provide for the pooling of resources and means as well as the Group-wide supervision of risks, finance and IT, for enhanced Group-wide productivity, particularly relating to the cost of risk and financial performance.

SOCIAL & ENVIRONMENTAL RESPONSIBILITY

ENCOURAGING EXCELLENCE BMCE Bank Foundation

The BMCE Bank Foundation for Education and Environment placed 2014 under the sign of improvement of educational services, ensuring more efficiency and effectiveness in managing its activities.

As usual, to make relevant and useful changes in terms of renovation and educational innovation, Dr. Leïla MEZIAN BENJELLOUN, the Foundation's chairman, ensured a close monitoring of educational and environmental actions as well as their implementation, structured along three major lines: (1) extending the Medersat.com network ; (2) modernizing the monitoring of the learning process and of the educational and managerial performance of human resources; (3) promoting the material environment and enhancing the value of the immaterial environment.

Extension of Medersat.Com network

At the national level, on the occasion of the start of the school year in September 2014, the new school of Béni Chicker in Nador opened its doors, thereby expanding the Medersat.Com network, which now comprises sixty-two (62) schools nationwide. The school is the fruit of an exemplary partnership between BMCE Bank Foundation and the East

of Morocco Region Development Agency.

In Mali, the Medersat.Com school of Bamako, the subject of a partnership with Mali's Children's Foundation, is ready to accommodate pupils. This school contributes to the consolidation of Medersat.Com network at the international level, and is the third school in friendly African nations.

2014 highlights also included the signing of a partnership agreement between BMCE Bank Foundation, Represented by Dr Leïla Mezian Benjelloun and Association « Servir le Sénégal » represented by Senegal's First Lady H.E. Mrs. Marème Faye Sall. This agreement concerns the financing by BMCE Bank Foundation of the development and equipment of an educational center in Senegal

Innovation and teaching performance of Medersat.Com

Under the leadership of the Foundation chairman and thanks to the support of the Confucius Institute, the teaching of Mandarin, the Chinese language most used worldwide, is now offered by the Medersat.Com network schools. The teaching of the basics of this language was started during the second term of the 2014-2015 school year at the Bouskoura Medersat.Com school. To mark this occasion, a ceremony was held in the presence of

the Chairman of the BMCE Bank Foundation, the Chief Executive Officer of BMCE Bank and their guests, including His Excellency the Ambassador of the Peoples Republic of China in Rabat, the President of the Casablanca Hassan II University and the Director of the Confucius Institute.

Furthermore, concerning the management of the overall educational program, this year saw the assessment of the learning performance of the Amazigh, Arabic and French languages, along with mathematics, in accordance with internationally recognized standards.

Encouraging excellence in Medersat.Com network

Following the reception hosted by the Foundation at BMCE Bank Group Head Office recognizing the June 2014 session's best undergraduate students, and as part of encouraging excellence, some schools of the Medersat.Com network organized ceremonies at the local level to reward their former students having obtained their baccalaureate with excellent grades. The aim of this is to promote girls' schooling and raise awareness among pupils and parents on the epidemic of school wastage beyond primary education

Academic life and cultural and environmental activities in Medersat.Com

Using ceremonies, theater plays and painter workshops, Medersat.Com network schools celebrated several themed seminars such as Women's Day on March 8th, World Environment Day on June 5th and the Child Finance Week. SUSTAINABLE DEVELOPMENT

A year of entrenchment of best CSR practices

The rapid evolution of CSR is reflected in the passage from the management of projects by the DD & CSR department to a cross-functional coordination and support on all CSR themes in the Bank. This cross-cutting synergy aimed at integrating the CSR criteria in the Bank's business lines is supported by a good listening capacity of the stakeholders of the Bank and the first steps towards extra financial reporting according to the Global Reporting Initiative standard.

In December, the Bank requested an extra financial rating extended to all CSR fields in order to effectively measure the level of progress gained.

Strengthening the analysis of social and environmental risks

Support to the divisions and to the network has continued and aimed at entrenching ESM due diligence habits (environmental, social and governance) in risk analysis, through the implementation of SEMs and EPs.
